

Transform, convergent, and divergent boundaries change Earth's surface.

Think about how these boundaries change Earth's surface.

Now explain to the reader of your paper how these boundaries change Earth's surface.

Every layer of the Earth is important in its own way. Think about which layer you think is most important and why you think so.

Now explain to the reader of your paper why you think that the layer you selected is the most important.

People have been dreaming about traveling to the center of the Earth for hundreds of years. Imagine what it would be like if you could travel to the center of the Earth. Think about what you would see on your journey to the center of the Earth.

Now tell a story about your journey to the center of the Earth.

Pangaea has slowly broken apart over millions of years, resulting in the current placement of the continents.

Think about how Pangaea broke apart.

Now tell a story about how Pangaea broke apart and how the pieces drifted to their current placements.
