

Matter makes up all material things. It is anything that has mass and takes up space. You can describe matter by its qualitative characteristics and quantitative values.

Now explain, with examples, the differences between the qualitative characteristics and the quantitative values of matter.

This image shows a blank sheet of white paper with horizontal ruling lines. The lines are evenly spaced and extend across the width of the page. There are no margins, text, or other markings on the paper.

You learn about your surroundings through experiencing information you take in through one or more sense organs. These organs are your eyes, ears, nose, tongue and skin.

Think of why each of the five senses is important, and how they help you observe and interact with the world around you.

Now, write to explain to the reader of your paper what your five senses are and give examples of how they have helped you learn about your surroundings recently.

Matter makes up all material things. It is anything that has mass and takes up space. You can describe matter by its qualitative characteristics and quantitative values.

Think about some of your favorite things.

Now, describe to the reader of your paper, one of your favorite things and why it is important to you.

[illegible]

Imagine one of your five senses became more powerful than the rest for a day.

Think about which sense you would like to be more powerful than the other senses.

Now, write a story describing your day and how having a powerful sense changed the way you observed the things around you.
